(4/29/20)</p> <p>Key Findings:</p> <ul style="list-style-type: none"> • The overall volume of hospital-based care for patients with COVID-19 appears generally stable, within the model uncertainty, consistent with prior predictions;

	<ul style="list-style-type: none"> • It remains unclear if current measures are adequate to lead to a reduction in illness, or if more effective measures will be required; • The number of hospital beds in Los Angeles County appears adequate to meet the projected need for the care of additional COVID-19 patients over the next 4 weeks; • The number of ICU beds in Los Angeles County, especially with the addition of new ICU beds through multiple efforts across the County, is likely adequate to meet the projected need for the care of additional COVID-19 patients over the next 4 weeks; and • The number of mechanical ventilators in Los Angeles County appears adequate to meet the projected need for the care of additional COVID-19 patients over the next 4 weeks. <p>For an update on the County healthcare system including data on available Hospital Beds, Ventilators, and Personal Protective Equipment visit the Department of Health Services COVID-19 Dashboard.</p>
COVID-19 RECOVERY PREREQUISITES	<p style="text-align: center;">Prerequisites for Easing Safer at Home</p> <ol style="list-style-type: none"> 1. Capacity in the Healthcare System – in hospitals and for routine health care, we need staffing, ventilators, testing and medical supplies. 2. Protections for those at risk – the elderly, those with underlying health conditions, live in institutional settings, are homeless, or don't have access to services. 3. Increased capability to test, isolate and, quarantine – for anyone who has symptoms and ensure they receive timely results. 4. Maintain physical distancing and infection control - education, supplies, and guidance for businesses and public places.
