This dashboard summarizes COVID-19 Diagnostic Testing using the Polymerase Chain Reaction (PCR) Molecular test for SARS-CoV-2 at Community Testing Sites in Los Angeles County. This dashboard will be updated weekly. Data presented on testing completed at County- and City-operated Community Testing Sites only reflects a portion of the testing happening across LA County. Additional information on Countywide COVID-19 testing can be found on the Los Angeles County Department of Public Health Dashboard, Long Beach Public Health Dashboard, and the Pasadena Public Health Dashboard.
The graph only reflects testing volume and capacity at City and County-operated COVID-19 community testing sites and the State Optum Serve Sites. Additional testing volume and capacity at the State supported Verily sites, as well as the over 50 Additional Testing sites, including CVS, DHS Clinics, and FQHCs are not reflected in the graphs above. Additional testing volume from these other testing sites will be added as data becomes available.

LA County Testing Volume (All Sources)

1. Data includes testing done in all settings including: hospitals, clinics, skilled nursing facilities, homeless shelters, etc., in addition to community testing done in drive thru and walk-in sites. Data does not include the Cities of Long Beach and Pasadena. Recent dates are incomplete due to lags in reporting. The gray box corresponds to dates that are likely to not yet be reported completely. **Electronic Lab Reporting Data only.** Not all laboratories submit electronic reports, positive persons will not equal cases.
