This dashboard summarizes COVID-19 Diagnostic Testing using the Polymerase Chain Reaction (PCR) Molecular test for SARS-CoV-2 at Community Testing Sites in Los Angeles County. This dashboard will be updated weekly. Data presented on testing completed at County- and City-operated Community Testing Sites only reflects a portion of the testing happening across LA County. Additional information on Countywide COVID-19 testing can be found on the Los Angeles County Department of Public Health Dashboard, Long Beach Public Health Dashboard, and the Pasadena Public Health Dashboard.
1. The graph reflects testing volume and capacity at fixed City and County-operated COVID-19 community testing sites and State sites. Additional testing volume for over 100 additional testing sites, including CVS, and FQHCs are not reflected. Unused capacity includes no shows and unscheduled appointments. The drop in testing volume during the weeks of 11/22, 12/20 and 12/27 were due to holiday closures. On 1/9/21, LA City closed two testing sites (Dodger Stadium and VA).

2. Data includes testing done in all settings including: hospitals, clinics, skilled nursing facilities, homeless shelters, etc., in addition to community testing done in drive thru and walk-in sites. Data does not include the Cities of Long Beach and Pasadena. The gray box corresponds to dates that are likely to not yet be reported completely. There will be reporting delays associated with the holidays. Electronic Lab Reporting Data only. Not all laboratories submit electronic reports, positive persons will not equal cases.

Community (PCR) Testing Demographics

(LA County Population N = 10,278,834; Total Tests with SOGI Information for tests completed at Community Testing Sites N = 2,702,591)

1. Tests completed at the fixed City and County-operated community COVID-19 testing sites between March 30, 2020 – May 29, 2021. City data was only available through June 27, 2020. Does not include tests completed at State testing sites or Additional Testing sites (e.g., CVS, Community Clinics, etc). We will add data from other testing sites as data becomes available.

2. Community testing site percentages are based on the 95% responses received.

3. Community testing site Percentages are based on the 95% responses received.
